

Nerd? Great! – Just like us!

“Out of the box” thinking is a skill that we need repeatedly to solve varying challenges in our daily business.

POCKETHOUSE
YOUR HOUSE IN YOUR POCKET

“Start-up feeling” vs. long-time-perspective – at Pocket House both is possible! Pocket House is supported by financially strong investors (global players), which makes your job safe.

Our benefits:

- **Work-Life Balance** – Just as important to us as it is for you! Needless to say, we offer **flexible working hours** and **home office**.
- **Vibrant Workflow** – Kanban assisted software development as one team
- **Pocket Family** – **After work** and other **team revents** on a regular basis. And, of course, as much **coffee** as you can drink.
- **Top Location** – our office is situated **opposite of the U6** and right at the **Meidlinger Markt**

Your skills:

- You are well acquainted with technologies like **Java/Kotlin, Spring, Hibernate, PostgreSQL, GraphQL** (but that's not a precondition for your application).
- Start-up Mindset – trial and error, flat hierarchies and innovation are a given for you
- Working independently, as part of an experienced team, is the cornerstone of your way of working.
- You are a team player and know how to communicate efficiently
- Ideally, you have already gained some experiences in a similar position.

You have come to the right place!

**BACKEND SOFTWARE DEVELOPER
(fulltime)**

We look forward to receiving your application along with your earliest possible starting date and remuneration package expectations, sent to bewerbung@pockethouse.at

POCKET HOUSE GmbH

...was **founded 2018** by three young professionals from the IT and Urban Development industry. In the past years we could successfully take root in the PropTech sector. With our software systems we enable and organize the future of living and working. Booking shared rooms and digital access systems are just some of our features, which we offer for our Austrian and international customers. Operating in a permanently changing field, we use up-to-date technologies and coding language.
